

The *School of Sea* is a private initiative for research, conservation and scientific dissemination of marine environment and marine megafauna.

Marine mammals biology and history, scuba diving projects and educational activities are under course.

For the year 2009, funds for research and education were obtained from Project AWARE Foundation Grant.

www.escolademar.pt

We have *curricula* and a group of researchers available to conduct investigation on cetaceans abundance and monitoring, human impacts on marine mammals populations, cetaceans ecology, behavior and conservation, and marine historical ecology and environmental history.

Our expertise focuses on European and African waters.
